Floating Aerators

When the city removed the lagoons and old oxidation ditch from the sewer plant as part of the latest renovation/expansion, these aerators became surplus equipment. They are very large and bulky units and require cranes and truck to move. There are a total of 11 units (six 40 HP units and five 15 HP units). These units are approximately nine years old (we think). These units are VERY expensive if buying new but we have only been offered a pittance from a salvage / re-use perspective (\$8,500). We recently reached out to our neighbors to see if they had interest. Thompson's Station, Chapel Hill and Franklin have expressed varying degrees. My thought was if their residual value was so little would we be better off giving them to our neighbors versus accepting only \$8500 from a group that was going to clean and resale them.
