

**Development Department Outreach and Engagement with the Business Community
Presented by the City of Spring Hill TN**

The overall goal of the Development Department is to responsibly grow land-use development and the street networks which support past, current and future development in a manner that enhances the quality of life for residents and stakeholders within the City of Spring Hill. These tasks include aspects of Engineering associated with Development, Building Codes Enforcement, Permitting and Planning.

The Development Department would like the opportunity to introduce our City Engineer, Lawrence (Lance) Holdorf and discuss the planning process to include what the Development Department looks for as we complete the site plan review and planning application process. We have identified three (3) dates to hold a series of meetings aimed at sharing information and receiving input from the business community which will guide the Development Department, the Planning Commission and Board of Mayor and Alderman as we set the expectations for required information to be submitted as part of Planning and Engineering documents. The dates and times of the meetings are as follows:

1. Wednesday, April 27 from 11am-12pm
2. Tuesday, May 3 from 11am-12pm
3. Thursday, May 12 from 11am-12am

All meetings will be held at the Spring Hill City Hall.
